

José Luis Illana Ruiz

Software Architect · Large-Scale Distributed Systems & Platforms

17+ years of experience in software engineering

Design and scale distributed platforms for high-throughput data ingestion and processing, shared platform services and developer tooling.

Bridge architecture, hands-on engineering and operations across the software lifecycle, from design through production.

Recent focus on observability and monitoring for mission-critical banking infrastructure.

SKILLS

Design, development and evolution of distributed platforms for large-scale data ingestion and use

Observability and monitoring

Resilience, scalability and high availability

Technical leadership and people management

Go, Java and Scala

Elasticsearch and time-series platforms

CI/CD, TDD, BDD, TLS and mTLS.

AI-assisted engineering: efficient use of AI-assisted software development, AI SDD and Harness Engineering.

RECENT EXPERIENCE

BBVA Technology in Europe

Principal Platform Architect (Technical Lead) - Monitoring & Observability Platform BBVA

January 2020–present

- Architect and develop telemetry ingestion and query services for traces, logs, metrics and alerts. Ingestion processes millions of individual events per second (EPS), enabling real-time observability and querying.
- Own platform and container infrastructure operations, capacity planning and lifecycle evolution, with multi-region, high-availability architectures supporting mission-critical banking services.
- Drive cross-team technical alignment, translate business requirements into scalable architectures and champion CI/CD, TDD and BDD practices to mitigate risks and technical debt.
- Design, implement and maintain IAM, service discovery, RBAC and secure service exposure for developer self-service, enforcing secure-communication standards and pre-production technical validations.
- Lead critical incident resolution, root-cause analyses and post-mortems to improve platform fault tolerance and resilience.

PROFESSIONAL TRAINING

AI Foundations — OpenAI Academy · 6 July 2026. Completed training; Course Completion Certificate. Verification.

AI Expert — DevExpert · 20 June 2026. Completed online professional training.

LFS148: Getting Started with OpenTelemetry — The Linux Foundation · 30 March 2026. Completed training; Learning credential, Foundational level. Verification.

Big Data on AWS — Qwiklabs · 30 August 2015. Completed company-provided professional training. Verification.

Solutions Architect - Associate — Qwiklabs · 17 August 2015. Company-provided professional training; not an official AWS certification. Verification.

EARLIER EXPERIENCE

BEEVA — now BBVA Technology · Big Data and Backend Developer November 2014–December 2019

Big Data architecture and development with Java and Scala. On Reporting Operacional, BBVA's internal observability and reporting platform for banking procedures, I contributed to the architecture and developed the service layer, ETL and analytics with Pig and Hadoop. I also contributed to proofs of concept for external clients, including Ferrovial.

BEEVA belonged to the BBVA group during this period; my career at the company has continued since November 2014.

Indra · Java Analyst Programmer April 2012–November 2014

Analysis, development and maintenance of web applications and backend services for Telefónica, mainly in Java, with Flex and Flash modules. Continuation of the assignment begun through Grupo Arelance after my direct hire by Indra.

Grupo Arelance · Java Programmer February 2010–April 2012

Assignment to Indra with Telefónica as the final client. Programming, requirements analysis and design on Java projects with Flex and Flash modules.

Efeso Consulting · Java and Flash Programmer and Systems Administrator 2008–2010

Java and Flash development; Linux system and Oracle database administration.

EDUCATION

I.E.S. Las Fuentezuelas — FP II, Software Application Development · 2005–2007.

IPFA Jaén — Science Baccalaureate · 2005–2006.

LANGUAGES

Spanish: native. English: professional working proficiency; comfortable conversation in professional contexts.
